Spreadable Pistachio Paste

Product feature

It is made by mixing it with a certain amount of sugar. There are generally two attributes:

1. Quality: Produced from early harvested pistachios between 75-80%.
2. Quality: It is produced from 60-67% Pistachios harvested early.

Thanks to its special packaging, this Spreadable Pistachio paste has a long shelf life and maintains its freshness. Antep pistachio butter, which is rich in protein and fiber, acts as an excellent energy source with high nutritional value and is free of additives.

Pomegranate Sour

Product feature

Thanks to the vitamins K, C, and E in pomegranate sour, it enhances the body's resistance. Pomegranate sour, which regulates blood circulation, prevents thickening and widening of arteries. However, an important point to consider is that excessive consumption of authentic pomegranate sour can lower blood pressure.

Dried Pepper

Product feature

Famous for its stuffed dishes, Gaziantep has gained significant renown due to its unique climate, which enables the cultivation of vegetables. The stuffing ingredients grown in this region are highly suitable for the preparation of these dishes. Thanks to its climate conditions, it is the most suitable city for drying processes. In cities with high humidity, proper drying is not possible, and mold forms, whereas in cities with extremely dry air, products can get burnt. Therefore, production and drying processes are carried out only in a few cities in Turkey.

Dried Acura

Product feature

Dried acura is a commonly used ingredient in Middle Eastern cuisine. It adds a distinctive aroma and texture to dishes. Acura stands out with its high fiber content. Fiber helps regulate the digestive system, supports bowel movements, and improves digestive health. Dried acura can be used in various dishes, especially in meat dishes, rice, soups, and stews, to enhance flavor and nutrition.

Dried Zucchini

Product feature

Dried zucchini is not very well known among stuffed peppers. Despite this, it has fans from all walks of life. There is also a separate variety called sliced zucchini. Gaziantep is famous in Turkey in terms of dryers. Thanks to the climatic predisposition, the drying processes in this province are very successful, since they receive the sun's rays in the desired amount and angle.
